Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claim Rejection under 35 U.S.C. 102(e)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 5,7,9,11,16 are rejected under 35 U.S.C. 102(e) as being anticipated by Breton et al (US 6264962; 7/24/01). Breton teaches an aqueous cosmetic composition comprising 4-chloro-3-indoleacetic acid (plant hormone) and alcohol. See abstract, column 3 lines 59-65, column 4 lines 42-66, claims 1,11,13,15,17. Instant claims are to a system comprising 4-chloro-3-indoleacetic acid and nothing more. Therefore, a prior art composition comprising 4-chloro-3-indoleacetic acid and water would read on Applicant's system. For this reason the prior art cited herein reads on instant invention. In a claim drawn to a composition, a statement to the composition's intended use has no patentable significance.

Claim Rejection under 35 U.S.C. 103(a)

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Breton et al as applied to claims 5,7,9,11,16 above. See 35 U.S.C. 102(e) rejection above. Breton teaches all that is recited in claim 6 except for the composition comprising the instant concentration range of 4-chloro-3-indoleacetic acid. It would have been obvious to one having ordinary skill in the art to determine the optimum concentration of 4-chloro-3-indoleacetic acid. One would have been motivated to do this in order to make a cosmetic composition that would have been effective in stimulating lipid synthesis.

Claim Objection / Allowable Subject Matter

Claims 8,10,13,15,17,18,20-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach or suggest the instant invention comprising polyoxyethylalkyl phenyl ether, xylene, nonyl phenyl ether. The prior art does not suggest the application of the instant compounds of formula I onto plant leaf. The prior art does not teach or suggest the instant system comprising a sprinkling system. The elected

composition (system) comprising 4-chloroindole-3-acetic acid, alcohol, polyoxyethylene alkylphenyl ether and calcium is allowable.
